

# Mold Cleaner EZR

## Description

Mold Cleaner EZR is a special blend of HAP-free\* solvents designed to remove waxy and greasy contaminants from molds. Mold Cleaner EZR is ideal for the final preparation of new or mechanically cleaned mold surfaces in readiness for the application of mold release systems. Mold Cleaner EZR is also excellent as a surface “freshener” prior to the application of a mold release touch-up coat.

\*HAPs are not formula constituents of this product. Standard manufacturing processes may result in trace quantities [ $<0.1\%$ ] of HAPs.

## Application

1. Use Mold Cleaner EZR in a properly ventilated environment with the appropriate personal protective equipment (refer to the MSDS for additional information).
2. Apply Mold Cleaner EZR to a cool mold surface with clean, 100% cotton cloths. While the mold surface is still wet, vigorously wipe the mold dry with a second clean, dry, 100% cotton cloth.
3. Frequently exchange saturated cloths with new, clean cloths.
4. Repeat process several times (a minimum of two cleanings is recommended) until all contaminants (dirt, dust, grease, etc.) are removed.
5. The mold is then ready for application with the appropriate mold release system.

## Storage

For best results, store between 55-80°F/13-27°C. Do not store at temperatures above 100°F/38°C. Keep container tightly sealed to prevent evaporation and/or moisture contamination. If stored in cold temperatures, allow product to warm to room temperature prior to use.

## Handling

Mold Cleaner EZR is flammable and must be kept away from heat, sparks, and open flame. The can should be kept closed when not in use to prevent evaporation of flammable solvents. Store the material in a cool location. Avoid breathing of vapor or spray mist or prolonged contact with skin. Use only with adequate ventilation. DO NOT take internally. In confined areas, operators should wear respirators or fresh air masks. Industrial grade solvent resistant gloves should be worn while using these materials. For more information, request a copy of Chem-Trend's Material Safety Data Sheet.

## Packaging

Mold Cleaner EZR is available in 1-quart (1-liter), 1-gallon (3.8-liter), 5-gallon (20-liter) and 55-gallon (208-liter) containers.

While the technical information and suggestions for use contained herein are believed to be accurate and reliable, nothing stated in this bulletin is to be taken as a warranty either expressed or implied.

### Further Information

Request information on our complete range of materials: custom-formulated release agents for polyurethane molding; tire lubes and bladder coatings; Mono-Coat® semi-permanent release coatings; aerosol formulations; mold cleaners and sealers; specialized coatings and application equipment.
